THE JOINT CHIEFS OF STAFF

WASHINGTON, D.C. 20301

18 December 1967

Dear Dick:

The next interagency, politico-military game is EPSILON I-68. It will address problems associated with NATO's transition from peace to war, with primary focus on the Southeastern flank. This approach was proposed with a view to examining command, control and coordination relationships within the Alliance, as well as US national channels. The game will be conducted concurrently in Washington and Wiesbaden, Germany. Ambassadors Bohlen, Bruce, Cleveland, McGhee, Reinhardt and Talbot; General Lemnitzer and Admiral Ward; and other senior personnel have indicated they will attend the final move and critique in Wiesbaden.

This game will depart from the usual format for these exercises in that the Blue or US team, meeting in the Pentagon, will communicate during its meetings with individuals in the role of key US personnel in the NATO Council, US Embassies, US component commands and the NATO military structure. The game should point up some of the very real problems of coordinating policy and strategy under crisis conditions, especially with respect to the deployment and possible employment of nuclear demolition munitions. This "US-only," politico-military game is expected to deal more realistically with certain key political considerations than would be possible in the HIGH HEELS or FALLEX type of exercise. Ambassador Cleveland is considering the possibility of conducting a similar politico-military game in the future, with Allied participation, as part of NATO nuclear planning and consultative procedures.

EPSILON I-68 has been structured with a view to having interested members of the Senior Interdepartmental Group or their representatives participate as the US National Command Authority team, meeting from 1630 to 1800 hours on Monday, 22; Wednesday, 24;
